IMPORTANT INFORMATION (CONT.)

Explanation of terms used in your notice of assessment

Tax on taxable income

We calculate the amount of tax you pay on your taxable income. We work it out based on the information in your tax return. This amount may be nil.

Tax offsets

Tax offsets directly reduce the amount of tax you pay. They are not the same as deductions. Deductions are taken off your income before your tax is worked out.

With a tax offset, we work out the tax due on your taxable income then reduce it by the total amount of your tax offsets.

Non-refundable tax offsets

Most tax offsets are non-refundable tax offsets. Non-refundable tax offsets can only reduce the amount of tax on your taxable income to zero. This means that if your non-refundable tax offsets are greater than your tax on your taxable income, you do not get a refund of the excess amount.

PAYG credits and other entitlements

The detailed information page includes details of any credits or interest entitlements that have been taken into account in working out your refund or amount owing. An example of these credits is any tax that was deducted by your employer or bank from payments they made to you during the financial year.

Refundable tax offsets

If you are entitled to any refundable tax offsets, they reduce the amount of tax on your taxable income. If the tax on your taxable income is reduced to zero and not all of your refundable tax offsets have been used up, the excess reduces your Medicare levy and any other amounts you owe. Any amount of a refundable tax offset still left over after this is refunded.
